INDEX: VOLUME 26

AUTHORS AND SUBJECTS

Abstracted system 313–323.
Accomodative behavior 229–242.
Adaptive systems 103–113.
Albegov, Murat: see Alexander Umnov.
Algebraic topology 51–62.
Ambiguity 216–228.
Approval voting 135–142.
Arickx, Marnix, & Van Avermaet, Eddy. Interdependent learning in a minimal social situation. 229–242.
Associative learning 243–255.
Associator 256–271.
Bailey, Kenneth D. Abstracted versus concrete sociological theory. 313–323.
Bargaining 163–176, 337–345.
Bartoszyński, Robert, & Puri, Madan L. A note on predicting the results of chess championship matches. 85–87.
Bartoszyński, Robert, & Puri, Madan L. Some remarks on strategy in playing tennis. 379–387.
Bean, Steven J.: see Darwin P. Moradiellos.
Beer, Stafford. Death is equifinal: Eighth annual Ludwig von Bertalanffy memorial lecture. 185–196.
Behavior, accomodative 229–242.
Behavior, nonequilibrium 103–113.
Bertalanffy memorial lecture 185–196.
Bifurcation of behavior 75–78.
Book Reviews:
Casti, John L. *Connectivity, complexity and catastrophe in large-scale systems*, (Robert Rosen, rev.). 117–178.
Cobb, Loren, & Thrall, Robert M. (Eds.). *Mathematical frontiers of the social and policy sciences. AAAS selected symposium*, (Anatol Rapoport, rev.). 394–397.
Dahlberg, Kenneth A. *Beyond the green revolution: The ecology and politics of global agricultural development*, (Robert W. Bosserman, rev.). 180–181.
Fleck, Ludwik. *Genesis and development of a scientific fact*, (Mario Bunge, rev.). 178–180.
Gibson, James J. *The ecological approach to visual perception*, (Bruce A. Whitehead, rev.). 308–309.
Guntern, Gottlieb. *Social change, stress and mental health in the pearl of the Alps. A system study of a village process*, (Anatol Rapoport, rev.). 306–308.
Horn, David J., Mitchell, Rodger D., & Stairs, Gordon R. (Eds.). *Analysis of ecological systems*, (Anthony C. Janetos, rev.). 396–397.
Luenberger, David G. *Introduction to dynamic systems, theory, models, and applications*, (Thomas G. Hallam, rev.). 397–398.
Varela, Francisco J. *Principles of biological autonomy*, (Matthew Witten, rev.). 88–89.
Bosserman, Robert W. The role of mathematics in systems science. 388–393.
Bosserman, Robert W.: see book reviews, Kenneth A. Dahlberg.
Boulding, Kenneth E. Human knowledge as a special system. 93–102.
Boundary 37–50.
Brams, Steven J.: see Peter C. Fishburn.
Bunge, Mario: see book reviews, Ludwik Fleck.
Cantley, Mark F. Strategic control for a United Kingdom regional health authority: A conceptual framework. 1–28.
Catastrophe theory 63–74, 75–78, 153–162.
Channel and net 79–84.
Chase, Sheldon, Wright, Jesse H., & Ragade, Rammohan. Decision making in an interdisciplinary team. 206–215.
Chase, Sheldon, Wright, Jesse H., & Ragade, Rammohan. The inpatient psychiatric unit as a system. 197–205.
Chess 85–87.
Cobb, Loren. Parameter estimation for the cusp catastrophe model. 75–78.
Coercion 143–152.
Collective bargaining 153–162.
College recruitment 366–378.
Computer modeling 294–305.
Computer simulation 114–129.
Conceptual system 354–365.
Concrete system 313–323.
Conflict 37–50.
Cross-level control 75–78.
Cross-level experiment 79–84.
Cross-level processes 103–113.
Cusp model 75–78.
Cuzán, Alfred G.: see Richard J. Heggen.
Cybernetics 93–102.
Decision making 1–28, 29–36, 37–50, 79–84, 85–87, 135–142, 143–152, 153–162, 163–176, 197–205, 206–215, 216–228, 229–242, 243–255, 272–280, 281–293, 294–305, 324–336, 337–345, 366–378, 379–387.
Decision time 79–84.
Decompensation scheme, general 354–365.
De Greene, Kenyon B. Limits to societal systems adaptability. 103–113.
Dialectic 281–293.
Distributed modeling 354–365.
Election systems 135–142.
Elliott, Donald. Sequential unordered logit applied to college selection with imperfect information. 366–378.
Equifinality 185–196.

Equity, social 135–142.
Equity theory 63–74.
Exchange theory 272–280.
Expansion path analysis 143–152.
Expected utility 135–142.
Field theory103–113.
Fishburn, Peter C., & Brams, Steven J. Expected utility and approval voting. 136–142.
Flood, Merrill M. Influence, sincerity, and pareto optimality under utility value voting. 324–336.
Forecasting 281–293.
Foreign policy 272–280.
Fuzzy labels 216–228.
Game theory 163–176, 379–387.
General systems theory 51–62, 93–102, 103–113, 185–196, 206–215, 281–293.
Group 79–84, 153–162, 163–176, 229–242, 256–271, 324–336, 337–345.
Group voting behavior 346–353.
Guastello, Stephen J. Catastrophe modeling of equity in organizations. 63–74.
Hallam, Thomas G.: see book reviews, David G. Luenberger.
Haustein, Heinz-Dieter. Human resources, creativity, and innovation: The conflict between *Homo faber* and *Homo ludens*. 243–255.
Health authority, regional 1–28.
Health care system 354–365.
Heeler, Roger: see Ted Mitchell.
Heggen, Richard J., & Cuzán, Alfred G. Legitimacy, coercion, and scope: An expansion path analysis applied to five Central American countries and Cuba. 143–152.
Holistic model 313–323.
Hollenhorst, Jerry: see Donald Elliott.
Hospital psychiatric treatment 197–205, 206–215.
Human inference 294–305.
Individual 29–36, 63–74, 79–84, 93–102, 130–135, 243–255, 272–280.
Individuality theory 216–228.
Inference, human 294–305.
Information, ambiguity in 216–228.
Information processing 93–102.
Information systems 216–228.
Input transducer 366–378.
Interdisciplinary team 206–215.
Internal transducer 256–271.
Isomorphism 313–323.
Jain, Virender. Structural analyses of general systems theory. 51–62.
Janetos, Anthony C.: see book reviews, David J. Horn.
Keeney, Ralph L. Measurement scales for quantifying attributes. 29–36.
Kleinmuntz, Benjamin: see Don N. Kleinmuntz.
Kleinmuntz, Don N., & Kleinmuntz, Benjamin. Decision strategies in simulated environments. 294–305.
Knowledge 93–102.
Knowledge organizations 51–62.
Labels, fuzzy 216–228.
Leap, Terry L.: see Terence A. Oliva.
Learning 93–102.
Learning, associative 243–255.
Learning model, linear 229–242.
Legitimacy 143–152.
Lewis, L. Floyd, II. Conflicting commands versus decision time: A cross-level experiment. 79–84.
Linear learning model 229–242.
Living systems theory 197–205.
Logit 366–378.
Majority rule 346–353.
Management information systems 216–228.
Man-machine system 256–271.
Mapping theory 51–62.
Marker 313–323.
Markovian measure 130–135.
Mathematics 388–393.
Measurement scales 29–36.
Memory 243–255, 256–271.
Metamodels 337–345.
Methodology 51–62.
Microcomputer 79–84.
Minimal social situation 229–242.
Minimization techniques 354–365.
Minorities 324–336.
Mitchell, Ted, & Heeler, Roger. Toward a theory of acceptable outcomes. 163–176.
Modeling 153–162, 337–345.
Modeling, cusp 75–78.
Modeling, distributed 354–365.
Modeling, holistic 313–323.
Modeling, manpower planning 130–135.
Monitoring 1–28.
Moradiellos, Darwin P, Tsokos, Chris P., & Bean, Steven J. Some Markovian measures in an organizational manpower planning model. 130–135.
Murthy, H. S. K.: see Terence A. Oliva.
Negotiator 163–176.
Nonequilibrium behavior 103–113.
Normative structure 114–129.
Oliva, Terence A., & Leap, Terry L. A typology of metamodels in collective bargaining. 337–345.
Oliva, Terence A., Peters, Michael H., & Murthy, H. S. K. A preliminary empirical test of a cusp catastrophe model in the social sciences. 153–162.
Organization 1–28, 63–74, 103–113, 130–135, 135–142, 163–176, 197–205, 206–215, 243–255, 354–365, 366–378.
Organizations, knowledge 51–62.
Output transducer 366–378.
Partition 51–62.
Peters, Michael H.: see Terence A. Oliva
Pipino, L. L., van Gigch, John P., & Tom, Gail. Experiments in the representation and manipulation of labels of fuzzy sets. 216–228.
Prediction 85–87, 379–387.
Preference set 114–129.
Prescriptive analysis 29–36.
Probability 379–387.

Programmed strategy 229–242.
Psychiatric treatment 197–205, 206–215.
Puri, Madan L.: see Robert Bartoszyński.
Ragade, Rammohan: see Sheldon Chase.
Rapoport, Anatol: see book reviews, Loren Cobb.
Rapoport, Anatol: see book reviews, Gottlieb Guntern.
Reproducer 37–50.
Richelson, Jeffrey T. A comparative analysis of social choice functions, IV. 346–353.
Robertson, C. Kamila. Experimental evaluation of an interactive information processing aid for an emergency poison center. 256–271.
Robinson, Mike. The identity of human social groups. 114–129.
Role theory 272–280.
Rosen, Robert: see book reviews, John L. Casti.
Schrodt, Philip A. Conflict as a determinant of territory. 37–50.
Scope 143–152.
Sequential unconstrained minimization techniques 354–365.
Set theory 51–62.
Signal detection theory 63–74.
Simulation 294–305.
Social choice 346–353.
Society 37–50, 103–113, 114–129, 135–142, 143–152, 243–255, 272–280.
Stability 114–129.
Strategic control 1–28.
Subsystems 197–205.
Supporter 37–50.
Supranational systems 37–50, 103–113, 281–293.
Systems 313–323, 337–345.
Systems design 216–228.
Systems dynamics, nonlinear 75–78.
Systems methodology 51–62.
Systems science 388–393.
Task structure, ambiguity in 216–228.
Tennis 379–387.
Territory 37–50.
Tom, Gail: see L. L. Pipino.
Topology, algebraic 51–62.
Tsokos, Chris P.: see Darwin P. Moradiellos.
Typology 337–345.
Umnov, Alexander, & Albegov, Murat. An approach to distributed modeling. 354–365.
User study 256–271.
Utility 324–336.
Van Avermaet, Eddy: see Marnix Arickx.
van Gigch, John P.: see L. L. Pipino.
Voter strategy 135–142.
Voting 324–336.
Voting behavior, group 346–35.
Walker, Stephen G. The correspondence between foreign policy rhetoric and behavior: Insights from role theory and exchange theory. 272–280.
Whitehead, Bruce A.: see book reviews, James J. Gibson.
